ASSOCIATION

# Construction Supervision Fundamentals

## ABOUT THE COURSE

Construction Supervision Fundamentals (CSF) is designed specifically to meet the needs of the learner, as well as the construction industry. Developed, updated, and field tested by contractors for contractors, this course focuses on the knowledge, skills and attitudes required for effective construction supervision. It is especially appropriate for those who are new supervisors, newly promoted foremen, or for anyone who seeks career advancement in leading and directing.

## ATTENDING THE COURSE

The 25-hour course, held over three days, focuses on nine topics and includes case studies and group activities. It also provides jobsite exercises for continued skill development. Who should take this course: Aspiring front line leaders who are looking to learn entry level management skills to lead construction activities.

## COURSE INSTRUCTORS

Individual sessions are paired with ACE Consulting's professional personnel based upon subject matter expertise. Click to learn more about ACE Consulting.

## COURSE CONCEPT

The CSF course is a highly interactive first step on the path to developing construction supervisors. This course presents nine foundational skills of successful supervisors:

- Team Management
- Project and Team Leadership
- Communication Skills
- Time Management and Project Scheduling
- Risk Management
- Construction Law and Contract Documents
- Problem Resolution
- Productivity and Cost Control
- Skills Development
